

Jean-Sébastien Hould

Project Manager | Software Developer | CAD Automation Specialist

 j-should@outlook.com |  [linkedin.com/in/j-should](https://www.linkedin.com/in/j-should) |  Trois-Rivières, Quebec, Canada

Professional Profile

Seasoned software developer with over 12 years of experience in CAD automation and project management. Expert in developing innovative solutions for mechanical engineering, combining advanced technical skills and team leadership. Recognized for the ability to optimize processes and deliver robust and scalable software solutions.

Technical Skills

Programming Languages - C#, VB, SQL, Python, PowerShell, iLogic

CAD Automation - Autodesk Inventor, AutoCAD, Vault, SolidWorks, EPDM

Frameworks & Technologies - .NET, EFCore, WPF

Testing & Quality - MSTest, NUnit, xUnit

Methodologies & Concepts - Agile, SOLID, Lazy Loading, KISS, Parallelism, MVP, Repository, MVVM

Management/Version Control Tools - TFS, GIT, Azure DevOps

Domain Expertise - Sheet metal design - Welding symbols - CAD administration

Professional Experience

Project Manager, Software Development

Bousquet Technologies | Sainte-Julie, Quebec
July 2021 - Present (4 years)

- Complete management of software development projects from analysis to delivery
- Coordination of technical teams and quality assurance of deliverables
- Development of custom automation solutions for industrial clients

CAD Automation Team Leader / CAD Manager

Nortek Air Solutions, LLC | St-Léonard d'Aston, Quebec
March 2018 - July 2021 (3 years)

- Strategic direction of software architecture for the Mechanical Engineering department
- Management and prioritization of CAD automation requests
- Administration and optimization of Autodesk Vault for 50+ users
- Implementation of development standards and best practices

Software Developer / Team Leader / CAD Manager

Nortek Air Solutions, LLC | St-Léonard d'Aston, Quebec
September 2017 - March 2018 (7 months)

- Participate in the management of the CAD automation tools requests.
- Master the Mechanical Engineering department software architecture.
- Manage the implementation and use of Autodesk Vault 2018

Software Developer / Lead Mechanical Designer

Nortek Air Solutions, LLC | St-Léonard d'Aston, Quebec
September 2016 - September 2017 (1 year)

- Study and master the Mechanical Engineering department production IT /IS process.
- Participate in the management of the CAD automation tools requests.
- Participate in the organization of the department.
- Provide internal training, for custom and native IT Tools.

Software Developer / Mechanical Designer

Nortek Air Solutions, LLC | St-Léonard d'Aston, Quebec
April 2015 - September 2016 (1 year 6 months)

- Development of new automation tools for the Mechanical Engineering department
- Design and maintenance of new software architectures
- Database management and performance optimization

Mechanical Designer / Programmer

Nortek Air Solutions, LLC | St-Léonard d'Aston, Quebec
October 2012 - April 2015 (2 years 7 months)

- Development and maintenance of CAD automation tools
- Technical support for mechanical designers
- Resolution of issues related to system evolution

Mechanical Engineering Technician

Johnston-Vermette | Bécancour, Quebec
June 2012 - October 2012 (5 months)

On assignment: Gentilly 2 Nuclear Power Plant - Complete management of mechanical engineering files - Coordination and closure of technical projects

Mechanical Engineering Technician

Estampage JPL | Trois-Rivières, Quebec
January 2012 - June 2012 (6 months)

- Supervision of the Welding-Assembly department
- Calibration of measurement tools
- Welding jigs design.
- Creation of drawings and guidelines for productions.

Education

DEC in Mechanical Engineering
CÉGEP de Trois-Rivières | 2006 - 2009

DEP in Welding/Assembly
Qualitech | 2005 - 2006

Awards

Best Student in Mechanical Engineering (Design)
CÉGEP de Trois-Rivières
